

Iago Cunha Oliveira

Objective: Junior Front-End Developer | Junior Full Stack Developer

22 years old, Fortaleza - Brazil

Email: dev.iagocunha@gmail.com | Phone: +55 (85) 98903-5010

Linkedin: <https://www.linkedin.com/in/oiaagocunha/> | Github: <https://github.com/oiaagocunha>

Portfólio: <https://portfolio-oiaagocunha.vercel.app/>

SUMMARY

Full Stack Developer with strong frontend expertise, specialized in building modern, high-performance applications focused on user experience. Recognized at FIEC Hackathon for innovation and social impact. Experienced in end-to-end applications, combining clean backend architecture (Node.js, Express, MongoDB) with highly usable and performant interfaces (React, TypeScript, Tailwind). Skilled in workflow automation using n8n, code quality practices, SEO, and testing.

EDUCATION

Estácio University - **Associate Degree in Systems Analysis and Development**

Feb/2024 – Jul/2026 (4th semester)

IDIOMAS

English (B1- solid technical reading, progressing in writing and conversation)

Portuguese (Native)

PROFESSIONAL EXPERIENCE

Product Development Intern — Sistema FIEC | Fortaleza, Brazil

Full Stack Developer | Mar/2025 – Present

I work as a fullstack developer on strategic projects that support public policy decisions and social impact. I led the development of the [CLT Simulator](#), a financial simulation platform, and refactored the [GOVMONITOR](#) frontend, integrating it with an existing PHP/Laravel backend via Inertia. On the frontend, I used **React, TypeScript, Tailwind CSS, and shadcn/ui**, building clear and performant interfaces, while on the backend I worked with **Node.js, Express, and MongoDB**. I implemented complex financial simulation logic and the integration of multiple variables through REST APIs, ensuring scalability, usability, and high performance.

In addition, I delivered significant internal improvements: I implemented **4 automation workflows with n8n in 30 days**, eliminating manual rework and human errors, and built an internal **QR Code application** that reduced document and system access time by 60%.

COURSES & ADDITIONAL EXPERIENCE

Full Stack Web Development — Digital College Brasil (192h, 2024)

FIEC Hackathon — Top 5 finalist for innovation and social impact (2024)

Personal projects in **frontend** and **fullstack** available at: portfolio-oiaagocunha.vercel.app

SKILLS

Strong knowledge: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Radix UI, UX/UI, SEO, Node.js, Python, Express, PostgreSQL, MySQL, MongoDB, Git, GitHub, n8n.

Currently learning: Docker, Java, Cypress, Jest, PHP, Laravel.
